Total Activity Control

Integrated Credit Card Processing

Process your Credit Card Payments Directly from the TAC Payment Posting Screens.

- Save time
- Reduce costs
- Increase efficiency

Pay a single invoice, all invoices for a customer or site, or all invoices for your monthly billing for customers that have pre-approved use of credit cards for paying monthly invoices.

Offer the same level of service to your customers that the largest companies in the country supply to their customers, e.g., phone companies, utilities, cable, etc.

Through a partnering relationship, Clear Computing customers can get reduced rates using NXGEN Payment Services, a national provider of credit card processing and payment services, including Electronic Check Management, Payroll Cards and Internet e-commerce solutions.

Call 1-888-332-5327 for more information about credit card processing using Total Activity Control.
