

Stop-By-Stop with Profit & Loss

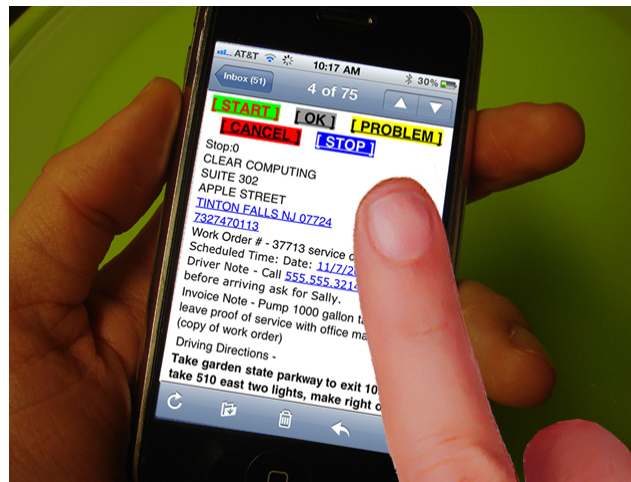

Monitor Your Business Operations in Real-Time

Total Activity Control now provides customizable stop-by-stop production tracking which allows you to monitor your business operations in real time. This feature offers the following benefits:

- Real-time visual monitoring of activity start and completion
- Status to flag problem work activities
- Profit and loss by service stop as each stop is completed
- Profit and loss for each work order, once invoiced
- Faster invoicing of completed work

This feature gives drivers an easy method to send back status at each location, throughout the day. As well as single-click indications of job start and end, additional information can be sent to provide:

- Extra work to be invoiced (e.g., extra cleaning)
- Normal billable work completion
- Status for potential additional sales (e.g., over-use, needed repairs, or enhanced services new barrels, etc.)

Requirements

- Smart phone
- Email service
- Internet service in office
- Latest version of TAC with full site support
