

# TACTrackerPRO

*Real Time Service Tracking and Reporting*

**Low-Cost, Reliable Service Tracking with Real-Time Updates to the Industry's Leading Management Software!**

## \* Date, Time and Location of Driver

Office computers will **display in seconds** the time, date and location of the drivers **for each service activity performed**, e.g., delivery, service, exchange, removal, etc., and track service on **maps or color-coded tabular displays**.

## \* Verification of Unit Locations & Service

The information sent by the TACTrackerPRO scanner automatically updates **production tracking information** at the office to supply key operational tracking numbers, e.g., units/hour, time and date of scan, etc.

## \* Works With A Low-Cost, Wireless, Lightweight Scanner

**Bar Code or RFID**, your choice. You can start **with low-cost** bar codes now, and migrate to RFID later, if you choose.

## \* Developed by Industry Leaders You Know and Trust

TACTrackerPRO combines the power of **Total Activity Control 2008** with **Insight USA's Street Eagle** to offer a comprehensive **operations monitoring solution** for the waste industry.

## \* Provides Needed Flexibility in Actual Field Conditions

If you choose to scan using bar codes and have a missing or damaged code, the driver can scan the printed bar codes on the route sheet, or scan the peel-and-stick proof-of-service labels printed for each unit.

Status	Date Time	VehicleID	Code	Type...	Site .
1-OK	9/23/2007	YP	R10005	R ...	1
