

# Total Activity Control 2010

## *New Features*

### **Operational Savings and Cost Reductions**

- Real-Time, Two-Way Stop-by-Stop Driver Reporting
  - TAC sends work orders and service stops to drivers
  - Drivers use button clicks to send job status back to office
- Ability to charge for sending printed invoices.
- Format notes for work orders, invoices, etc. with bold, highlight, font, etc.
- Full PCI Compliance for credit card processing
- Paperless enhancements including
  - Logging of all emailing
  - Customizable signature lines
  - Canned text message selection
  - Formatting with Bold, highlight, font selection and more
- Separate emails per work order for a driver/route/truck sent with a click.
- Bulk posting to include cash and/or accrual adjustments
- QuickBooks expansions
  - Monthly invoice
  - Posted receivables
- Expanded logging of operational activity (units mgt, service route & work order changes, etc.)

### **Monitoring State of the Business**

- Actual vs. Plan reports at site and customer
- Snapshot / Dashboard on business profitability

### **Reporting Improvements**

- Route reports can print recap of number of units by type (great for large sites)
- Reports that combine customer and site notes
- Inventory reports run by division or market

### **And More....**

- Support of netbooks with customer signature capture
- Garmin - Points of Interest export
- Windows 7 – 64 bit supported
- Faster operations with SQL 2005
- Expanded write on maps (great for specials and deliveries)
